**Objective**

Having three (3) years' experience, I like to craft solid and scalable frontend products with great user experiences. When it comes to building JavaScript applications, I have the right tools and the ability to work independently with them. My focus is on delivering fast, resilient solutions that are optimized for scalability and performance.

**Programming Language(s)**

JavaScript, TypeScript, Python

**Key Skills**

React, NextJs, Redux-tool-kit, HTML, Radix-ui, ShadCN, Framer-motion, Figma Git, Github, MongoDB, PlanetScale, Prisma, Drizzle, Testing, Deployment, Jest

CSS, Tailwind, SCSS, Bootstrap, Material-ui, Design system, Performance Optimizations, Software testing, SE Optimizations, Responsive Web-Design, UX-Design/Strategy.

**Experience**

With an unwavering dedication to my craft, I have honed my skills to create products that transcend mere functionality, breathing life into them through the seamless integration of aesthetics and functionality. My passion for innovation and problem-solving has led me to spearhead projects that push the boundaries of what is possible, embracing new technologies and methodologies with a penchant for staying ahead of the curve

**November 2019 - present**

**Frontend Lead**
Authentic Information Managers (AIM)

**Jan 2022 - Sept 2022**

**Frontend Lead (Contract)**
Spirit Of Africa (SOA)

**Sept 2022 - Dec 2022**

**Frontend Developer (Contract)**
Yamakuza NFT (Uganda)

**Projects**

**SOA:** I took charge of orchestrating and leading the development of Spirit of Africa's innovative JavaScript-centric app, where my responsibilities encompassed shaping the frontend infrastructure, designing the user interface, and implementing cutting-edge functionality using various technologies, notably React.

**Yamakuza NFT:** I led a team of developers through building multiple React applications into a single powerful trading platform. I also re-engineered and designed several components on the platform.

Software Engineer (Frontend) & UX Engineer

---

**AIM:** As a frontend engineer, I have had the privilege of contributing my expertise to several significant projects for both AIM and individual clients. These experiences have allowed me to hone my skills and deliver impactful solutions that cater to diverse needs and requirements. Throughout my journey, I have also taken on the role of a mentor, guiding and nurturing aspiring interns and junior developers in the frontend realm. By providing them with hands-on training and real-world exposure, I have enabled these budding talents to gain invaluable experience and develop a deep understanding of frontend development principles.
